

Artifact Analysis

Meet:

What is it?

How is the artifact identified? (*see display panel*)

What is the artifact made of?

Observe:

Describe what you see (consider the artifact's size, shape, age, condition, etc).

Understand:

Where and when is the artifact from?

Who may have used the artifact? What for?

What does this tell you about the people who made and used it?

What does it tell you about technology at the time it was made?

How does this artifact contribute to our understanding of history?

What other documents or historical evidence can use to help you understand this artifact?
